~~Replace the paragraph beginning page 24 line 15 as follows:~~

Preferred In preferred embodiments, information is not given to the artist that will enable him to choose reviewers who only review highly. For instance, a preferred embodiment only enables artists access to each reviewer's reliability data and cluster membership. Artists will then be motivated to pick reliable reviewers, as compared to reviewers who often disagree with the majority, but they will not have a means to predict reviewers who only rate highly. Of course, in such an embodiment, an identifier for a reviewer that would enable the artist to associate him or her with particular displayed reviews would not be made available.
